Journal of Molecular Structure (Theochem), 231 (1991) 389–391
Elsevier Science Publishers B.V., Amsterdam

SUBJECT INDEX

Adenosine receptor ligands
A model for the hydrogen-bonding interactions between adenosine receptor ligands and histidyl residues in the adenosine A_1 receptor binding site, based on AM1 calculations, 175
AlF_3–HF molecules
NDDO and ab initio molecular orbital studies of vapor phase complexes between HF and AlF_3 molecules, 95
Antineoplaston A10
MNDO studies on the structure of Antineoplaston A10, glutarimide and piperidine, 357

Benzenoid systems
The k-resonant benzenoid systems, 321

Carbonyl cyanide
Ab initio calculations of the equilibrium geometries and vibrational frequencies of carbonyl cyanide, thiocarbonyl cyanide and thiopropynal, 87
Cata-fusenes
Comment on the paper: Kekulé count and algebraic structure count for unbranched alternant cata-fusenes, J. Mol. Struct. (Theochem), 179 (1988) 99, 379
Cerium monoxide
The low-lying electronic states of cerium monoxide CeO: ab initio calculations using energy-adjusted pseudopotentials and spin–orbit operators, 243
Chemical spaces
Set spectra of chemical spaces, 367
Chlorocarbonyl isocyanate
How reliable are ab initio calculations? The structure and conformation of chlorocarbonyl isocyanate (ClC(O)NCO) revisited, 185
β-Chloropropiophenone
Electroreduction of β-chloropropiophenone: a study of stability of cis and trans isomers of 1,5-diphenyl-2,6-dioxa[3,3,0]bicyclooctane and on the logical reaction pathway, 169
ClO_4^-
Stability of the molecular anions ClO_4^-, HCO^- and O_3^- from the self-interaction corrected multiple-scattering Xα method, 307
CNH···NCH
Ab initio calculations of the properties of the CNH···NCH and C_3NH···NCH linear complexes, 267
C_3NH···NCH
Ab initio calculations of the properties of the CNH···NCH and C_3NH···NCH linear complexes, 267

Diatomic homonuclear molecules
Additive properties of electron density in diatomic homonuclear molecules: application to the hydrogen molecule, 21
1,5-Diphenyl-2,6-dioxa[3,3,0]bicyclooctane
Electroreduction of β-chloropiophenone: a study of stability of cis and trans isomers of 1,5-diphenyl-2-6-dioxa[3,3,0]bicyclooctane and on the logical reaction pathway 169
Diphenyl sulfide
Geometry changes with ionization in diphenyl sulfide, 195
1,4-Dithiin
Ab initio study of 1,4-dithiin and its cation radical and dication, 283

Furocoumarins
Ab initio study of the molecular structure of linear furocoumarins and pyrrolocoumarins, 163

Glutarimide
MNDO studies on the structure of Antineoplaston A10, glutarimide and piperidine, 357
Group overlap method
The maximum overlap symmetry orbital method and the group overlap method, 57

Haloperidol
Gradient-optimised geometries of a trans and a gauche conformation of haloperidol at the 4-21G level: comparison of the piperidino unit with gas phase piperidine, 137
HCO^-
Stability of the molecular anions ClO_4^-, HCO^- and O_3^- from the self-interaction corrected multiple-scattering Xα method, 307
$HCOO^- \cdot 2Me^+$
Nature of potential energy surface modification in reactions of formation and destruction of ion triplets $HCOO^- \cdot 2Me^+$, 151
Heterodimers of nitrous oxide and water
On relative stability interchange between H–O and H–N bonded heterodimers of nitrous oxide and water, 215
Histidyl residues
A model for the hydrogen-bonding interactions between adenosine receptor ligands and histidyl residues in the adenosine A_1 receptor binding site, based on AM1 calculations, 175
Hydrogen molecule
Additive properties of electron density in diatomic homonuclear molecules: application to the hydrogen molecule, 21
β-Lactam antibiotics
Theoretical calculations of β-lactam antibiotics. Part 1. AM1, MNDO and MINDO/3 calculations of some penicillins, 109

Large molecular systems
Construction of the symmetry orbitals in large molecular systems, 39

$M_{12}(I_h)$
Symmetry analysis of the electronic structure of polyhedron clusters $M_{12}(I_h)$, $M_{12}(O_h)$ and $M_{60}(I_h)$, 1
$M_{12}(O_h)$
Symmetry analysis of the electronic structure of polyhedron clusters $M_{12}(I_h)$, $M_{12}(O_h)$ and $M_{60}(I_h)$, 1
$M_{60}(I_h)$
Symmetry analysis of the electronic structure of polyhedron clusters $M_{12}(I_h)$, $M_{12}(O_h)$ and $M_{60}(I_h)$, 1

Magnetic susceptibility
Calculations of magnetic susceptibility of some molecules by the variational method using ab initio wave functions, 227
Maximum overlap population
Maximum overlap population principle and direct calculation of bond order, valence and atomic charge, 47
Maximum overlap symmetry orbitals
Construction of orthogonalized maximum overlap symmetry orbitals, 33
The maximum overlap symmetry orbital method and the group overlap method, 57
Molecular hydrogen elimination
Transition states for molecular hydrogen elimination from substituted silanes, 125

$(NO)_2$
Internal coordinate approach for the vibrational predissociation of $(NO)_2$, 291
Nucleic acid bases
MINDO/3 and MNDO studies of some thio analogues of nucleic acid bases, 103

O_3^-
Stability of the molecular anions ClO_4^-, HCO^- and O_3^- from the self-interaction corrected multiple-scattering Xα method, 307

Penicillins
Theoretical calculations of β-lactam antibiotics. Part 1. AM1, MNDO and MINDO/3 calculations of some penicillins, 109
Periodic polymer
The interaction of a laser pulse with a periodic quasi-one-dimensional polymer, 77
Piperidine
Gradient-optimised geometries of a trans and a gauche conformation of haloperidol at the 4-21G level: comparison of the piperidino unit with gas phase piperidine, 137
MNDO studies on the structure of Antineoplaston A10, glutarimide and piperidine, 357
Planar polyhexes
On the classification and enumeration of

planar polyhex hydrocarbons, 219
Poly(L-alanine)
Interchain interaction of ^{13}C NMR chemical shift and electronic structure of polypeptide chains in the solid state as studied by tight-binding MO theory: poly (L-alanine) with the right-handed and left-handed α-helix forms, 231
Polyglycine
Electron correlation effects on the energy band structure of polyglycine, 277
Pyrimidine-2-thiol
Semi-empirical molecular orbital calculations on pyrimidine-2-thiol and pyrimidine-2-thione: prototropic tautomerism, 257
Pyrimidine-2-thione
Semi-empirical molecular orbital calculations on pyrimidine-2-thiol and pyrimidine-2-thione: prototropic tautomerism, 257
Pyrrolocoumarins
Ab initio study of the molecular structure of linear furocoumarins and pyrrolocoumarins, 163

Substituted silanes
Transition states for molecular hydrogen elimination from substituted silanes, 125
Sulphur microclusters
Structural stability and energetics of sulphur microclusters: an MNDO calculation, 63
Superconductivity
Valence bond order and superconductivity, 335

Thiocarbonyl cyanide
Ab initio calculations of the equilibrium geometries and vibrational frequencies of carbonyl cyanide, thiocarbonyl cyanide and thiopropynal, 87
Thiopropynal
Ab initio calculations of the equilibrium geometries and vibrational frequencies of carbonyl cyanide, thiocarbonyl cyanide and thiopropynal, 87
Tyrosine kinase inhibitors
Semi-empirical molecular orbital calculations on tyrosine kinase inhibitors and structurally related compounds, 201

Vapor phase complexes
NDDO and ab initio molecular orbital studies of vapor phase complexes between HF and AlF_3 molecules, 95
Variational method
Calculations of magnetic susceptibility of some molecules by the variational method using ab initio wave functions, 227
